Pacific Wave Digital

BUSINESSLINK PACIFIC

Hosted by Business Link Pacific

Bring your business online

Digitisation, AI and Cyber Security

PARTICIPANT WORKBOOK

English teaching with supporting Bislama explanations

Training delivered by Pacific Wave Digital

Wednesday 21 October 2026 • 9 am–4 pm
Yumiwork Conference Room • Vanuatu time

Find customers. Work professionally. Build digital confidence.

Review edition • October 2026. Images are AI-generated illustrations of fictional people and settings; they do not depict the actual workshop.

Your workshop day

Time	Session	Your output
9:00–9:15	Welcome and goals	Choose your business outcome
9:15–9:35	Business identity and readiness	Accurate business facts
9:35–10:10	Google Business Profile	Demonstration and guided practice
10:10–10:45	AI for everyday business	Gemini, Storian AI and checking answers
10:45–11:00	Exercise briefing	Instructions, groups and questions
11:00–12:00	Student exercises	E1–E6: facts, profile, AI and peer review
12:00–1:00	Lunch	
1:00–1:35	Review and website draft	Review answers, draft and test a page
1:35–2:00	Customers online	Storefront, booking and chatbot demo
2:00–2:15	Afternoon tea	
2:15–2:45	Professional business documents	Practice invoice and receipt
2:45–3:30	Protect your digital business	Account and scam-response actions
3:30–4:00	Review and keep learning	30-day plan and workshop course access

Use your business, or a fictional practice business. Work on paper or share a device if needed. Never record passwords, recovery codes or private customer details here.

Your business journey

Digitisation turns information into digital form: a paper receipt becomes a digital record. A useful digital workflow also clarifies who captures, checks and uses that information.

Today we connect tools to real business work: a customer finds you, understands your offer, contacts or books with you, and receives a clear business document.

Bislama • Yumi lan blong mekem ol kastoma oli faenem bisnis blong yumi mo mekem wok i kam gud moa.

Stage	What success looks like
Prepare	Accurate business details and a registration next step
Be found	A prepared or improved Google Business Profile
Build	A clear website draft and customer action
Serve	A tested storefront, booking or chatbot plan
Protect and continue	Safer accounts and a 30-day learning plan

My name / business / island

The one result I most want from today

01 Prepare your business

Use one consistent real-world business name, contact number, location or service area, and description across your website, listing and documents.

Name, registration and licence are different

A business name identifies the trading name. Registering a company creates a company through a separate process. A business licence authorises the relevant business activity; an online listing does not replace it.

Use VFSC to check the register and ask about the right registration route. For business licensing, confirm requirements with Customs and Inland Revenue and the relevant local authority. Keep current certificates and renewal details. [R1–R3]

Bislama • Nem blong bisnis, rejistresen mo laesens oli no sem samting. Askem ofis we i stret sapos yu nidim help.

Workshop task: prepare your information and next step. This session does not promise completed registration or provide individual legal advice.

02 Help customers find you

Google Business Profile (formerly Google My Business) helps eligible businesses present accurate information on Google Search and Maps. It is one route to discovery, alongside your website and other channels.

Prepare before you create

• Check whether your business is eligible: it generally needs in-person contact with customers. Online-only businesses are not eligible. [G1]

• Search for your existing business first. Claim or request access to the existing profile instead of making a duplicate. [G2]

• Use the real business name, appropriate category, accurate hours, contact details and location or service area. [G4]

• Keep the business owner in control of the account. Follow the verification options Google offers. Completion may take longer than today. [G3]

Bislama • Putum stret infomesen blong bisnis blong yu blong ol kastoma oli save faenem yu.

03 AI that helps you work

Use Gemini to draft and improve business text. Use Storian AI (https://storianai.com) to explore ideas and explanations in Bislama. ChatGPT is another conversational AI option. The useful skill is giving clear facts and checking the answer.

A reliable prompt has four parts

- Task: What should the AI do?
- Facts: What is true about your business?
- Format: What should the result look like?
- Limits: What must it not invent or include?

Bislama • Talem klia wanem yu wantem. Givim stret infomesen. Jekem ansa bifo yu yusum.

AI can make confident mistakes. Check names, prices, dates, availability and translations. Use fictional data for practice; keep private customer, financial and account information out of prompts.

Student exercises 11 am to noon

Practise the business readiness, Google Business Profile and AI lessons already taught. Work individually or in pairs. Complete E1–E6 in order, then submit by noon.

Choose one business

Use your own public business facts or fictional Island Services: cleaning in Port Vila, Monday to Friday, 8 am–4 pm. Customers contact the team for price and availability. No phone number, price or testimonial has been supplied. Mark missing details for follow-up. Do not create a real Google listing for the fictional business.

Time	Exercise	What to complete
11:00–11:10	E1 Business facts	Business facts and one sentence
11:10–11:20	E2 Google profile	Profile preparation and next step
11:20–11:35	E3 AI prompt and draft	Prompt and description of up to 50 words
11:35–11:45	E4 Check and improve	Fact check, correction and final copy
11:45–11:55	E5 Partner review	One useful suggestion and revision
11:55–12:00	E6 Finish and submit	Name, next action and afternoon question

If you cannot use the tools

Write your prompt and description on paper. Prepare your Google profile details without submitting them. If stuck, write the problem and continue to the next exercise. Keep passwords and private customer information out of your work.

Use a partner or another table for E5. If a partner is unavailable, use the same checklist to review your own work and mark it as self-review.

Exercise E1 Your business facts

11:00–11:10 • Complete your business facts. Use these again in E2 and E3. Partner review follows in E5.

Information	My accurate details
Trading name / owner or entity	
Main product or service	
Customers I serve	
Public contact details	
Location or service area	
Opening hours	
Registration / licence status	
Next official check and responsible person	

One sentence: We help ... by providing ...

_____

_____

Use public business contacts only. Confirm what you are entitled to publish; do not use another business's name or images.

Exercise E2 Your Google profile

11:10–11:20 • Search if you have access, then prepare the details. Without internet, complete the plan and mark the search for follow-up. If ineligible, prepare website information instead.

Check	My answer / next step
Existing listing found? Who controls it?	
Eligible for in-person customer contact?	
Real business name and category	
Customer-facing address or service area	
Phone / hours / approved photos	
Website link to add later	
Verification or ownership next step	

Before you leave this activity

Can a customer recognise the business and contact it? Does the owner retain access? Do not pay someone who guarantees a top ranking or asks for your verification code.

One improvement I will make this week

_____

_____

Exercise E3 AI prompt and draft

11:20–11:35 • Use the four parts taught this morning: task, facts, format and limits. Write your prompt, then use Gemini if available. Without access, write the description yourself.

Example prompt

Write a friendly business description of no more than 50 words for fictional Island Services. It provides cleaning in Port Vila, Monday to Friday, 8 am–4 pm. Customers must contact the team for price and availability. Do not invent a phone number, price, testimonial or guarantee.

My prompt including task, facts, format and limits

My first description of no more than 50 words

Optional if time remains: ask Storian AI to explain your description in Bislama. Ask a fluent speaker to check the meaning.

Exercise E4 Check and improve

11:35–11:45 • Compare the draft with your E1 facts. If you wrote it yourself, use the same checks. Explain a correction, or explain one claim you checked and why it is accurate.

Check	Accurate or correction needed
Business name and service	
Location and opening hours	
Price and availability claims	
Contacts, promises and testimonials	
Private information and language meaning	

A correction or checked claim and the reason

My improved description of no more than 50 words

Exercises E5 and E6 Review and submit

E5 Partner review 11:45–11:55

Exchange work. Check whether a customer can understand the offer and how to enquire. Compare it with E1. Give one useful suggestion. Improve your E4 final description if needed.

Partner checklist	Yes or improvement
Offer and customers are clear	
Facts match the business information	
Contact process is clear without invented details	
No invented promises or private information	

Reviewer name or self-review

_____

Suggestion received and change made

_____

_____

E6 Finish and submit 11:55–12:00

Check that E1–E5 are complete. Add the details below and submit your workbook as directed during the briefing. Keep a copy of digital work. Unfinished items should show the next step.

My name and business

_____

My next action and completion date

_____

My question for the afternoon

_____

04 Build your online presence

In Digi Assist AI, turn your checked business facts into a simple website. The aim is a useful first version that works on a phone.

Your first page needs

- Business name and one clear sentence about your offer.
- Products or services, who they help and where you operate.
- Real photos you have permission to use.
- Accurate contact details, hours and one clear next action.
- A way to enquire, book or view products that you have tested.

Bislama • Mekem websaet i klia. Kastoma i mas save wanem yu salem mo hao blong kontaktem yu.

Work in preview or draft first. Check every generated claim before publishing. Public Digi Assist AI features are described at digiassistai.com; account access and available features must be confirmed for the workshop. [D1]

Activity 4 Plan and test your website

1:00–1:35 session • After the answer review and demonstration, spend 10 minutes drafting one headline, one service and a contact action, then 5 minutes on a partner test. Complete the remaining plan after the workshop if needed.

Headline: what do you offer?

_____

Two services or products and their value

_____

_____

Customer action: call, enquire, book or shop?

_____

Test	Pass / fix needed
Text readable on a phone	
Name, contact and hours correct	
No invented claims or reviews	
Customer action opens the right destination	
Only intended information is public	

Draft link or next step (no account passwords)

_____

05 Serve customers online

Choose the pathway that fits your business. Watch both demonstrations, then practise one. The aim is a clear customer journey, not a fully automated business in one afternoon.

Retail pathway	Service pathway
Create one product with a photo, description and accurate price.	Create one service with its duration and availability.
State stock, pickup or delivery and payment arrangements.	State location, booking conditions and confirmation process.
Test an enquiry or test order without taking a real payment.	Test a booking and check for clashes and confirmation.

Add a helpful AI chatbot

Give it approved answers about your services, hours and contact process. Tell it to hand uncertain questions to a person. Test unknown prices, unavailable services and requests for private information.

Bislama • Chatbot i save help, be sapos hem i no save ansa, hem i mas askem wan man blong help.

Activity 5 One customer journey

1:35–2:00 session • Watch the demonstrations, then spend 7 minutes planning one customer pathway and a chatbot handover. Complete remaining fields after the workshop if needed.

My pathway and the customer task

Step	What the customer sees / what I must check
1 Discover the offer	
2 Choose a product or time	
3 Submit a request	
4 Receive confirmation	
5 Staff follow up	

Approved chatbot answer: What do you offer?

Fallback answer: I cannot confirm that. Please ...

Never let the chatbot promise a price, stock level or booking that your business has not confirmed.

06 Work professionally

Invoice: a request for payment

Use a unique reference, issue date, business and customer details, item description, quantity, unit price, total, currency, due date and payment instructions. Check tax treatment with the appropriate adviser or authority.

Receipt: a record of payment received

Record the receipt reference, payment date, amount, currency, method, related invoice and any remaining balance. An invoice alone does not prove payment.

Bislama • Invoice i talem hamas mane kastoma i mas pem. Receipt i soem mane we bisnis i kasem finis.

Demonstration: create a draft invoice in Digi Assist AI, check it, record a fictional payment, then produce a receipt. Use demo data and verify the exact account workflow before delivery.

Activity 6 Invoice and receipt

Fictional practice only • Island Services supplies 2 cleaning visits at VT5,000 per visit. Invoice INV-001, issued 21 October 2026, due 28 October 2026. Customer: Demo Customer. For arithmetic practice, no tax or other charges are included; this is not a tax invoice template.

Description	Qty	Unit price	Line total
Cleaning visit	2	VT5,000	

Invoice total and currency

Demo Customer pays VT6,000 on 21 October by cash. Prepare receipt REC-001 and link it to INV-001.

Receipt detail	My entry
Amount received / currency	
Date / payment method	
Related invoice reference	
Outstanding balance	

Check: total = quantity × unit price; outstanding balance = total − payment. Keep invoice and receipt references connected. Use actual business tax rules in real work.

07 Protect your digital business

Five habits that protect today's work

Secure access

Use unique passwords, a password manager and two-factor authentication. Keep recovery methods safe. Never share codes. [C1]

Control ownership

Keep business accounts under business-owner control. Give staff only the access they need; remove old access.

Check unusual requests

Verify changed bank details through a number or contact route you already trust. Do not rely on the message itself. [C3]

Keep recoverable copies

Back up important business records and website content where supported. Test restoring a file. Sync alone may copy deletions. [C2]

Limit exposure

Update devices, lock screens and avoid entering passwords or customer records during a shared demonstration.

Bislama • No givim password o kod blong sekuriti long narafala man. Jekem ol mesej we oli luk narakaen.

The account I will protect first and my next action

_____

_____

Activity 7 Spot the risk

15 minutes • Discuss each situation. State what you would do before clicking, paying or replying.

Scenario	My safer next step
"Your Google listing will be deleted today. Send your verification code now."	
A supplier sends a new bank account by message and demands urgent payment.	
A chatbot invents a weekend booking and a discount.	
A former staff member still has owner access to the business website.	

If something has already gone wrong

Stop the transaction or contact the bank/payment provider quickly if money is involved. Secure the affected account through its official service; review sessions, recovery settings and access. Preserve evidence, tell the responsible person and use verified local reporting/support routes. If a device may be infected, disconnect it and seek technical help.

Who in my business should handle a security problem?

_____

_____

08 Keep learning with BLP and PWD

Business Link Pacific hosts this workshop, with training delivered by Pacific Wave Digital. Continue learning through the BLP workshop course on the PWD platform, with registration, session recordings, worksheets and instructor questions.

Your learning routine

- Register using the course link supplied by the facilitator.
- Open the session you want to revisit and replay the demonstration.
- Use the matching workbook activity to practise in your business.
- Post a question with the session name, what you tried and where you got stuck.
- Check the instructor's reply and record your next action.

Bislama • Afta long trening, yu save luk video bakegen mo askem ol tija kwestin long kos blong trening blong BLP mo PWD.

Course link: to be supplied before the workshop. Access duration and instructor response arrangements will be explained on the course page. Do not post passwords, private customer data or unredacted payment details.

My next 30 days

When	Action	Evidence / help needed
Within 48 hours	Secure my main account and finish my business facts	
Within 7 days	Improve my listing or website and test contact flow	
Within 30 days	Use one business workflow and review what improved	

My first action and completion date

A question I will post to the course

Confidence check: circle one number

1 = need help • 2 = can try with help • 3 = can do it myself • 4 = can explain it

Prepare an online business profile 1 2 3 4

Use AI and check its answer 1 2 3 4

Create a professional business document 1 2 3 4

Protect an account 1 2 3 4

Most useful part / what I still need help with

Knowledge check and resources

1. Does a Google listing replace business registration or a licence?

2. Should you create a second listing if your business already appears?

3. What must you check before using AI-generated business text?

4. Does an invoice prove that payment was received?

5. What do you do before paying changed bank details?

Useful starting points
